

ROTATING RIGHT

ME SERIES NOMINAL RATED PLEATED CARTRIDGES

MicroSentry™ **ME SERIES** **Nominal Rated** **Pleated Cartridges**

Shelco® introduces its full line of nominal rated pleated filter cartridges. With more square feet of filtering media, this cartridge offers more dirt holding capacity and longer changeout intervals than any other cartridge on the market. Made of economical polyester / polypropylene blended media, these cartridges are the best alternative to string wounds, resin boned, or spun cartridges. The MicroSentry™ MEE pleated cartridges are made of 100% synthetic fibers to eliminate any contamination from binders or additives. Make Shelco's ME series your choice for longer life and lower filtration costs.

Features

- More square footage of media provides a lower initial pressure drop
- Our ME Series is manufactured with no resin binders that can break down and contaminate the throughput
- Layers of media are laminated together to provide depth filtration
- The MEE is made of 100% synthetic fibers with no surfactants that cause foaming
- Pleated media offers more consistent flow patterns for higher micron efficiencies
- Fixed pore construction allows for higher dirt holding capacity without unloading as the differential pressure increases
- Available in 0.35, 1A, 1, 5, 10, 20, and 50 microns nominal and lengths up to 40"
- Available in both standard 2 ½" and 4 ½" (BB Style) configurations
- Cartridges rated for 10 Microns and above are washable and reusable significantly reducing filtration costs

FDA Compliance

Shelco® MicroSentry™ MEE Cartridges are manufactured of materials with no additives or other manufacturing agents. Shelco® certifies that all materials used in the production of these cartridges meet the requirements of FDA Title 21 of The Code of Federal Regulations.

Applications

- Water Purification
- Food & Beverage
- Bottled Water
- Plating Solutions
- Electronics
- Wastewater
- Photographic & Chemical solutions
- Commercial & Residential applications

Product Specifications

Materials of Construction

Filter Media – Polyester / Polypro Blend

Filter Core – Polypropylene

End Caps – Plastisol

Nominal Micron Ratings

0.35, 1A, 1, 5, 10, 20, 50

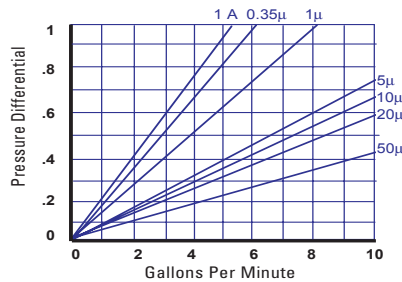

Nominal Lengths

10", 20", 30", 40"

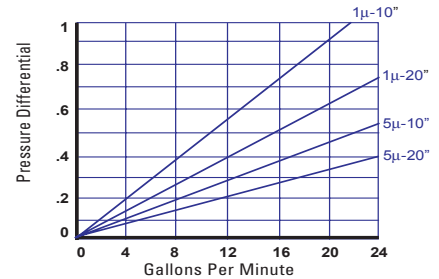

Operating Conditions

140° F (60° C) Max Temperature

Recommended change out 20/25 PSID

Standard Cartridge

Full-Flow (BB) Cartridge
